

6th Neurotechnology Innovation Forum & 2024 Annual Conference of Neuromodulation Branch of Chinese Neuroscience Society

Invitation Letter

Dear Attendees,

We sincerely invite you to attend the 6th Neurotechnology Innovation Forum & 2024 Annual Conference of Basic and Translational Neuromodulation Branch of Chinese Neuroscience Society, which will take place on 26th~28th April 2024 in Hengshan Park Hotel of Shanghai, China.

The field of neuromodulation research is rapidly expanding in China. Currently, approximately 150 hospitals offer deep brain stimulation clinical services, with over 1,000 hospitals providing transcranial magnetic stimulation treatment for psychiatric diseases. The national and local governments have allocated hundreds of millions of RMB in research funding to advance the understanding of neuromodulation mechanisms, develop technologies, and promote clinical translational research.

Recognizing the importance of fostering interdisciplinary collaboration, the Basic and Translational Neuromodulation Branch of the Chinese Neuroscience Society was established in 2023. This pioneering academic society aims to facilitate collaboration among neuroscientists, biomedical engineers, and clinicians in the field of neuromodulation.

As the inaugural event of this branch, our upcoming conference serves as both an opening ceremony and the first annual gathering. It will bring together leading scientists, innovators, and entrepreneurs to explore the opportunities and challenges in advancing neuromodulation for neurological and psychiatric diseases.

Yours sincerely,

Shouyan Wang

Deputy Dean, Institute of Science and Technology for Brain-Inspired Intelligence, Fudan University

Chairman, Neuromodulation Branch of Chinese Neuroscience Society

On behalf of the organizing committee
